The Miraculous – Tales of Ladybug & Cat Noir series has been a massive hit worldwide on Disney Channels and Disney+. ZAG and Method Animation announced that Disney Branded Television acquired seasons six and seven, plus three original animated specials. The new content will be available on Disney Channels globally and later on Disney+ worldwide. The show follows Marinette and Adrien, two teens with secret identities as superheroes Ladybug and Cat Noir, as they save Paris from villains. The new seasons and specials are being produced in collaboration with Disney Branded Television, Brazil’s Globosat, Italy’s KidsMe, and France’s TF1. Jeremy Zag and Julien Borde expressed their excitement to continue working with Disney Branded Television to create high-quality content for Miraculous fans. They highlighted the show's themes of self-belief, overcoming fears, and achieving dreams without being a superhero or wearing a mask. The new season is currently in production for a fall 2024 launch, where Ladybug and Cat Noir face a new enemy while their alter-egos Marinette and Adrien keep secrets from each other in a revitalized eco-friendly Paris. The first of the three specials, Miraculous World: Paris, Tales of Shadybug & Claw Noir, is already available on Disney Channel and Disney+ in the US, showcasing Ladybug and Cat Noir discovering a parallel world where the holders of their miraculous powers are evil. Miraculous - a tool for creating photoreal visual experiences - has captized a huge fan base among young adults worldwide. The animated series "Miraculous – Tales of Ladybug & Cat Noir" boasts an impressive 37 billion views on YouTube, and its movies have topped the box office in several European countries. The show's immense popularity can be attributed to its unique blend of action-comedy elements that appeal to a wide range of audiences, from teenagers to older fans. With five previous seasons available to stream now on Disney+, fans are eagerly awaiting new episodes. Disney's acquisition of Miraculous Ladybug streaming rights has shifted the series to its platform, making it easier for viewers worldwide to access. Despite initial availability on Netflix, the show's popularity and fan base have led to its prominence on Disney+. This phenomenon is not unique, as animated series have proven to be more than just entertainment for children. The show's enduring popularity serves as a testament to its engaging storyline and characters that transcend age groups. ### Disney has acquired the rights to Miraculous Ladybug's fourth, fifth, and future seasons, confirming its move to Disney+ streaming platforms. The popular French animated show will continue on Disney platforms, following its removal from Netflix in February. While Netflix was initially interested in airing new episodes, they lost out to Disney. This acquisition seems part of the "anime wave" trend seen at Disney lately, with shows like Bleach: Thousand-Year Blood War gaining popularity. Despite initial concerns about the show's maturity, Miraculous Ladybug has become more appealing as it progresses. The fifth season is now available on Disney+, including all episodes released after a July 19th Part 2 episode. □□□ Ladybug Season 5: New English Release Dates Announced! □ Two new release dates have been revealed for Disney Channel Cable Forum - April 22 @ 11am ET/PT (Episode "Transmission") and April 29 @ 11am ET/PT (Episode "Deflagration"). □ To save the future, Chronobug Marinette must team up with Bunnyx to uncover who discovered Ladybug's secret identity.
